**Re-Imagining Post Liberalization Cities In Socialist Perspective; A Case Of Cyberabad, Hyderabad**

Liberalization has opened gates for global multinational corporations to invest in cities which have certainly lead to change in city form and shape in many terms. from creating a distinct divide between rich and poor to change in typologies and From Creation of polynucleated cities to development without considering natural layers. From creating unsafe streets and neighbourhoods to changes in grain and texture and skyline. Cyberabad is one of the first cities in India to embrace the idea of liberalization and is one of the main exporters of IT in India. Liberalisation has created an unhealthy development pattern in cyberabad completely wiping out the existing population and marginalising the economically weaker section.

Urban design parameters are derived from the socialist theoretical base, design principles and design moves are identified to incorporate socialist ideologies into Urban design. This thesis aims to surgically intervene on existing fabric of cyberabad based on principles derived from socialist ideologies to create a more balanced development model considering all possible factors irrespective of cast class and power.
