Study On Heritage Public Open Space Affected By Development Projects

Heritage public open spaces are the heart of the physical and social environment. Increase in urbanization has affected the heritage public open spaces in various levels. As the modernization came over urban planners, we compromised with the living standards of the buildings by dismantling the traditional open spaces. To protect the heritage public open spaces new guidelines, designated authority, public awareness and strong regulations. As of now, there is no definition for heritage public open space. The aim of the project is to understand the concept heritage public open space and its characteristics. The projects help to identify various development projects affected on heritage public open space. The study also focuses on conservative guidelines and various measures taken by the authority. In Kerala, there are many cities which are historically important. Ancient Kerala has cultural, historical, religious, social importance. Many constructions have dismantled the heritage public open spaces in Kerala. There is no list for heritage public open spaces in Kerala. The main objective of the project is to provide remedies for the further development in heritage public open space.
