Post-Occupancy Asset Management Strategies For Public Housing Projects

The aim of Post-Occupancy Asset Management Strategies for Public Housing Projects is to understand the importance of post-occupancy asset management in public housing projects based on best practice in India. India's rapid urbanization growth and migration have given rise to many affordable housing schemes but there is a serious clash with the Post-Occupancy Asset Management system, financial management in public housing projects. This Project discuss about the Issues of public housing in India and Kerala to understand the current situation of asset management in public housing projects ; analysis the different Asset management strategies done by different organization across the world to understand the strategies of asset management and examines the study area to understand the current issues in the public housing sector and the lack of post-occupancy asset management strategies for public housing projects and formulate a post-occupancy asset management framework and strategies for public housing projects.
